DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figs. 1 and 2 are not legible or did not copy correctly. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed. The prior art discloses a method and system for simultaneous data transmission from fixed rate and variable rate sources, which can be synchronized for monitoring and comparing of the two data streams. The prior art further discloses an error correction means for providing error correction to a given data stream.

The prior art however fails to disclose or suggest a satellite communications network with a serial data stream having an ECL signal format and an error correction means or monitoring and comparing the error correction of two differing data streams and providing an error correction value based on the two differing data streams to either the first data stream or the second data stream.

Art Unit: 2664

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
